

# Tedy Clivel Fokou Temfack

Junior Software Developer | Flutter & Web

(+237) 676 846 818 | [tedyclivel1@gmail.com](mailto:tedyclivel1@gmail.com) | Centre Region, Cameroon  
[linkedin.com/in/tedy-clivel-fokou-temfack-2474ba331](https://linkedin.com/in/tedy-clivel-fokou-temfack-2474ba331) | [github.com/tedyclivel](https://github.com/tedyclivel)

## PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in mobile and web development using Flutter, Dart, React Native, JavaScript/TypeScript, and Supabase. Experienced in UI development, debugging, reusable components, REST API integration, and team collaboration. Interested in building reliable software and progressively strengthening secure software development practices.

## EDUCATION

|                                                                                                              |                           |
|--------------------------------------------------------------------------------------------------------------|---------------------------|
| <b>University of Yaounde I</b><br><i>Bachelor's Degree in Computer Science</i>                               | Yaounde, Cameroon<br>2026 |
| • Coursework included programming, system administration, computer networks, web security, and cryptography. |                           |
| <b>College Prive Laic A. Fleming</b><br><i>Baccalaureate in Information Technology</i>                       | Cameroon<br>2023          |

## EXPERIENCE

|                                                                                                      |                                   |
|------------------------------------------------------------------------------------------------------|-----------------------------------|
| <b>Flutter Front-End Developer</b><br><i>OUFAREZ</i>                                                 | 3-month contract<br>Cameroon      |
| • Developed and integrated mobile user interfaces using Flutter.                                     |                                   |
| • Contributed to feature design and user requirements analysis.                                      |                                   |
| • Collaborated with the technical team, resolved bugs, and improved the overall user experience.     |                                   |
| <b>Flutter Mobile Developer Intern</b><br><i>ARITED</i>                                              | Jun. 2025 – Sep. 2025<br>Cameroon |
| • Developed mobile user interfaces and reusable components using Flutter and Dart.                   |                                   |
| • Debugged applications and resolved UI and interface issues.                                        |                                   |
| • Collaborated with the development team on application development and feature improvements.        |                                   |
| <b>Embedded Systems Intern</b><br><i>Innovatech</i>                                                  | Jul. 2022 – Aug. 2022<br>Cameroon |
| • Built basic electronic circuits and wrote Arduino control programs for embedded systems exercises. |                                   |

## PROJECTS

|                                                                                                                                                   |                      |
|---------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>Kouture &amp; Maestro</b>   <i>Flutter, BLoC, Next.js, TypeScript, Tailwind CSS, Supabase</i>                                                  | Full-Stack Developer |
| • Designed and developed a SaaS platform for tailors combining a business management application with a web marketplace.                          |                      |
| • Built the mobile application with Flutter/BLoC and the web interface with Next.js, TypeScript, and Tailwind CSS.                                |                      |
| • Integrated both applications with a shared Supabase backend supporting authentication, centralized data management, and real-time interactions. |                      |
| <b>EduTrust</b>   <i>React Native, Expo, React.js</i>                                                                                             | Front-End Developer  |
| • Contributed to a university payment platform for managing tuition payments, receipts, and transaction history.                                  |                      |
| • Developed mobile and web interfaces using React Native, Expo, and React.js.                                                                     |                      |
| • Worked on user interfaces for payment workflows, receipt generation, and transaction history.                                                   |                      |

|                                                                                                                                                                                                                                                                                                             |                  |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
| <b>TchopTime</b>   <i>React Native</i>                                                                                                                                                                                                                                                                      | Mobile Developer |
| <ul style="list-style-type: none"> <li>• Developed a family kitchen management mobile application using React Native.</li> <li>• Implemented meal planning and menu organization features.</li> <li>• Built shopping list generation features to simplify everyday household organization.</li> </ul>       |                  |
| <b>LexiFlow</b>   <i>Flutter</i>                                                                                                                                                                                                                                                                            | Mobile Developer |
| <ul style="list-style-type: none"> <li>• Developed a mobile crossword puzzle game using Flutter.</li> <li>• Built gameplay interfaces and crossword-based user interactions.</li> <li>• Implemented a Duel mode allowing users to compete against friends.</li> </ul>                                       |                  |
| <b>Iron Mind</b>   <i>Flutter</i>                                                                                                                                                                                                                                                                           | Mobile Developer |
| <ul style="list-style-type: none"> <li>• Developed a mobile learning application using Flutter.</li> <li>• Implemented features for creating and managing personalized learning paths.</li> <li>• Built progress-tracking functionality to help users organize and monitor their learning goals.</li> </ul> |                  |
| <b>Cryptography CLI</b>   <i>C</i>                                                                                                                                                                                                                                                                          | Academic Project |
| <ul style="list-style-type: none"> <li>• Built an educational command-line application covering RSA, Affine, Hill, and Vigenere ciphers and basic cryptanalysis concepts.</li> </ul>                                                                                                                        |                  |

## TECHNICAL SKILLS

---

**Mobile Languages:** Dart, JavaScript, TypeScript  
**Web Languages & Markup:** JavaScript, TypeScript, HTML, CSS, PHP  
**Other Programming Languages:** C  
**Mobile Frameworks & Tools:** Flutter, React Native, Expo, BLoC, Android Studio  
**Web Frameworks & UI:** React.js, Next.js, Tailwind CSS  
**Backend & Databases:** Node.js, Supabase, PostgreSQL, REST APIs, authentication, realtime, storage  
**Developer Tools & Practices:** Git, GitHub, debugging, reusable components, REST API integration, basic CI/CD  
**Cybersecurity Exposure:** Web security, networking, cryptography, digital forensics; lab use of Kali Linux, Burp Suite, Wireshark, and Nmap

## ACTIVITIES
